

This law should not be overturned, we (the average American citizen) is having too many of our rights stepped on and taken away.

It is a protection to the elderly, people with mental illness and the average consumer. I have received several calls from telemarketers, when not receiving the answers that they want, they have another person call. Plus the fact that they get on the phone and call you by your christian name, instead of Ms. Violenes. They are not my friends! They do not disclose their purpose immediately. I do not care if this other person has a better phone-side manner, no is no!

It is annoying and inconvenient, especially if you are leaving the house or awaiting an important call. From eight o'clock until sometimes until ten o'clock they plague you with their calls.

It is my right as an American citizen (or I thought) to deny them access to my phone, as I would an unwanted stranger into my house. I am sick of them, I realize that people need jobs, but it should not infringe on my time and come over my phone.

DO NOT OVERTURN THIS LAW!!

Rena B. Violenes
